NOTICE TO RESIDENTS
EASEMENT CLEARING TO BE CONDUCTED IN YOUR AREA

As part of our annual maintenance program, North Coast County Water District (District) has scheduled waterline easement clearing for this service area. Clearing will involve removal of trees, brush and other obstructions that interfere with access to the below ground waterlines. In some cases, crews will need to utilize heavy machinery and equipment to assist with the removal.

To better serve our customers, we occasionally need to access public utility easements on private property in order to perform routine maintenance and repair work required to keep the distribution system operating properly. During emergency conditions, such as a water main break, it is critical that we have access to the easement area and the ability to work within it. The District has over 127 miles of easement and makes an effort each year to maintain access to these easements. An additional advantage of maintaining clean easements is that they also provide access to fire crews and create potential fire breaks in areas that are heavily vegetated.

We expect the work in your area will begin on June 22, 2026 and should be completed by July 2, 2026 depending on site circumstances and/or weather conditions.

Should you have any questions or concerns regarding the project, please contact Scott Dalton, Assistant General Manager at (650) 355-3462 between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday.

Thank you for your patience and understanding while we perform this important maintenance to our distribution system.
